SLOAN

Single-Flush Side Mount Operator

Cat#33544

Model#EBV-500-A

Battery-powered, sensor-activated, single-flush retrofit conversion kit for exposed closet and urinal flushometers. Can be used on standard rough-in Sloan, Royal, Regal, Crown, and Naval brand flushometers. **SmartSense Technology™**: Applies extended range and logic techniques to significantly reduce water usage in high use urinal applications, such as when a continuous line of people forms. The maximum amount of water used is only 2.0 gallons.

Automatic Operation: Activated via multi-lobular infrared sensor. The sensor sets the flushing mechanism when user is detected and completes the flush when the user steps away.

Manual Operation: Flushometers are activated manually by pushing the black TMO button.

Hygienic: Touchless, sensor activation eliminates the need for user contact except to initiate the True Mechanical Override button when required, to help control the spread of infectious diseases. The 72-hour Sentinel Flush keeps fixture fresh during periods of non-use.

SLOAN

Side Mount Operator

Cat.#06111

Easily converts your manual flushometer to modern water saving electronics. Cover is chrome plated metal. The Sloan side mount operator gives you these extra features and benefits:

- Programmable automatic flushing system
- Tempered glass lens
- Adjustable infrared sensing
- Low battery light notification
- Courtesy Flush™ button
- Chrome metal cover for easy cleaning
- Standard "C" batteries supplied
- Money savings – two minute installation
- Time savings – no water shut off required for installation
- Improved hygiene
- Fixtures stay cleaner
- Quick battery replacement – no need to shut off water
- Helps eliminate odors
- Increased water savings with electronics
- ADA compliant

For Sloan Royal®, Regal Pro® and Regal®
